

"The Czech Republic – The European Journey"

by

**Mr. Rudolf Hykl
Consul-General of the Czech Republic in Hong Kong**

The lecture will be about Czech Republic's post 1989 development – political and economic reforms, international aspects of the transformation – NATO, and especially EU; and will conclude with the current status description and upcoming EU presidency.

The underlying line is that the Czech Republic has always been a European country, its foundation in Europe is deep, the last 20 years have been a correction (and what it took) of the previous misfortunes and the country is now emerging as the fastest developing region of Europe with liberal political / economic agenda for our presidency in EU.
